Abstract

Through the collaboration of the team the project PN-III-P2-2.1-PED-2019-1480 / "Innovative System for Monitoring the Air and Aquatic Environment" - AWISEM with the project team PN-III-P2-2.1-PTE-2019-0085/ "Digitalization of Agriculture in Northern Baragan, by Using Drones, for the Purpose of Monitoring Crops, to Increases the Efficiency of Agricultural Technologies "-, AGRODATA, aims to create a drone specialized in collecting information about air and water chemistry with applications for precision agriculture.

Key words*: drones, precision agriculture, sensors*
